

Nova Viking

For kindergartens, schools and playgrounds

Facts

The Nova Viking range is yet another good Winther solution for meeting children's play requirements and their need for constant activity. These bikes and trikes live up to the requirements of any modern childcare facility regarding quality and durability in full. The easily recognisable Winther quality means that children are sure to enjoy riding them and playing with them. The Nova Viking range is designed for play activities in kindergartens, schools and at playgrounds. All Nova Viking products encourage children's play activities and the development of their motor skills in a way appropriate to their particular age.

Suitable for ages 2-8

The Nova Viking range features vehicles that help children experiment with using their bodies and finding new ways to move. These products can thus play a key role in games and activities that help develop children's motor skills.

The range includes:

- Traditional tricycles
- Taxi for more children at once, designed to stimulate their role-playing activities
- Several types of vehicles that help develop balance and coordination skills

Do bikes and trikes help give children a more balanced view of the world?

Maybe, maybe not. But what we do know is that children create whole worlds of drama while playing. They pick up input from everywhere – from the adult world, from stories,

from TV, from their friends, from previous experience, and much more. By living out the conflicts that are built into all these situations, children learn the difference between good and bad, and form their own personal picture of the world, the things in it, and the social order all around them. To do this, they use their imaginations, and good toys are important tools in this process.

Coupling to add further play value.

Harmonious, safe design with no sharp edges. Strong steel tubes ensure maximum strength.

Effective rust protection and impact-resistant powder coating that will last for many years.

Weather-resistant seat made of polypropylene. Solid rubber handlebar grips.

New improved wheels with excellent durability

Spokeless wheels with solid rubber tyres.

Steering limiter with no pinch point.

Strong nylon bearings for both front and rear wheels.

Strong, non-slip pedals. Solid one-piece steel crank.

- Safe and durable
- Complies with all current safety standards
- 3-year warranty on frame and fork
- Easy to assemble
- Full spare parts service
- Exploded spare part drawings are all available at www.a-winther.com
