LEARNING BY MOVING

NEW

Viking Truck | Model 493.00

New and funny truck which strengthens the social play and gives vent to the childrens' imagination. The bike is aimed at the age group 4-8 years.

The cargo enables the children to do transport of sand or playground equipment in general. Imagine the child in the role as a truck driver or Bob the Builder on his way to the building site. In this way the truck becomes an important element in the mutual play among the children.

The bikes are constructed in a beautiful and harmonious design in which all safety aspects have been observed.

Like all our other vehicles the Viking Truck is characterized by supporting motor abilities, imagination, reflexes and senses of the children.
